

Women and Heart Health

This program is sponsored by:

Women's Heart Foundation

<http://www.womensheartfoundation.org/>

The Women's Heart Foundation is an international coalition of nurse executives, civic leaders, community health directors, member hospitals, partners, providers and corporate sponsors responding to the health crisis of women's heart disease by implementing an integrated model that promotes wellness, early intervention and excellence of care for women. Symptoms of a heart attack may be milder in a woman and making a correct diagnosis a challenge.
